Please let me know if you will bring a DONATION ITEM(s) for our 2nd Annual SILENT AUCTION. The monies stay within the Westrek fund and passed on to next year's tour coordinators.

Summer Weather

Summer (mid-June through early September) typically provides our warmest temperatures. Although snow has even fallen on July 4th, summer weather tends to be drier and more pleasant. Highs can run in the 70's-80's (25-30°C.) Lows can drop to the 30's and 40's (0-10°C.) Afternoon thunderstorms are not uncommon.

The good news here is that some of our best storms have produced some wonderful sunsets and full rainbows.

Again, it's important to remember that Yellowstone's developed visitor areas range in elevation from 6,500 to 8,000 feet surrounded by a variety of mountain ranges. This high elevation makes the sun more intense, and the alpine weather patterns are more dynamic and quick-changing.

So please pack accordingly.
